

BCS v8.00x

Jan 31, 2016

Find (in menu bar at top of screen)

- user can now choose to search contacts in the Phone List (as before) or search their company's employee list

General

- all dropdown fields for customers and suppliers have had "auto-correct" turned off; having it turned on was causing issues when selecting a customer whose name contained an incorrectly spelled word
- all dropdown fields for employees now have the active employees sorted to the top and the inactive employees sorted to the bottom (the rationale being that active employees are more likely to be chosen)

Phone List

- bug fix: when in filter mode (either via Quick Filter or the Filter button), the Add button is no longer disabled

Sales Calls

- Details taqb
 - *Add Customer* button
 - bug fix: user is now brought to the Phone List in add mode

Reports

- tab name "Area & City" renamed to "Other Criteria" to reflect fact that tab contains several criteria items, not just Area and City
- Estimates
 - Master Estimate (#148)
 - user was always prompted to print child estimates, but used to have to say No to each child estimate; there is now a "No to all" option that can be clicked just once
- Quotes
 - Master Quote (#129, #162)
 - user is now prompted to print child quotes as well (possible answers are yes, no, no to all)
- Jobs
 - Master Invoice (#98, #178)
 - user is now prompted to print child invoices as well (possible answers are yes, no, no to all)
 - Down Job Analysis (#293)
 - new report

BCS v8.00w

Jan 23, 2016

Quotes

- bug fix: for master quotes, the total quote price is now properly calculated (for a behind-the-scenes field); this means that jobs based on a master quote now get costed properly (i.e., total Total Sell Subtotal is set to the price of the entire master quote)

Jobs

- Main tab
 - Printer button beside *Quote No.*
 - if quote is a master quote, the master quote report is now shown rather than the “regular” quote report
- Costing tab
 - *Cost the Job* button
 - bug fix: if the job’s underlying quote is a master quote, then the Total Sell Subtotal is now the sum of the individual quote prices making up the master quote

Reports

- Phone List
 - Total Dollars by Customer (#78)
 - bug fix: exported version of report was not matching the physical copy of the report

BCS v8.00v

Jan 21, 2016

Time Sheets

- 1-Day Summary, 1-Period Summary
 - on some computers, the total *Hours* was showing as blank; new logic has been introduced to address this

BCS v8.00u

Jan 9, 2016

Estimates

- Main tab
 - bug fix: reports #123 and #141 were not being displayed properly if *Quantity Type* or *Qty* were left blank (they are now no longer mandatory fields)

Administration

- Validation Tables
 - Jobs tab
 - Job Number Suffix table
 - new pencil button beside *Job Category*

BCS v8.00t

Jan 6, 2016

Quotes

- Line Items tab
 - for some users, the *Quote Price* was not being refreshed properly (even if the *Quote Price* field on the Main tab was being calculated properly); new logic has been put in place to address this

Jobs

- Inv From PO tab
 - for some users, the *PO active?* field was appearing as blank; new logic has been put in place to address this

BCS v8.00s

Jan 4, 2016

Purchase Orders

- Line Items tab
 - for some users, the *Grand Total* was not being refreshed properly (even if the *PO Total* field on the General tab was being calculated properly); new logic has been put in place to address this

Reports

- Purchase Orders
 - Subcontractor – Task List (#201)
 - bug fix: the temporary table that is used to hold the data for the report was not being emptied every time the report was being run, so this resulted in duplicate rows

BCS v8.00r

Jan 1, 2016

Estimates/Quotes/Purchase Orders/Jobs

- on the rare occasion, a record is generating without a number (e.g., a quote record without a Quote No.); steps have been put in place to hopefully address this moving forward

Estimates

- Main tab

- *Quantity Type* and *Qty* are no longer mandatory fields

Jobs

- Clone Job button
 - when cloning a problem job, the newly created job record no longer has a copy of the previous job's problem reason and comments

Reports

- Jobs
 - Service Order (#26), Service Order Work Report (#39)
 - the section showing Quote Description has been removed, since the information contained within it has likely been pulled into the Scope of Work (the General Description section on the report)

BCS v8.00q

Nov 29, 2015

Jobs

- *Chg Suffix* button
 - new pencil button to the right of job number suffix dropdown

Reports

- Jobs
 - Invoiced Jobs - Details (#287)
 - new report

BCS v8.00p

Nov 11, 2015

Registration

- some clients were erroneously seeing a warning that they were running an evaluation version of BCS; BCS was not properly recognizing that they were registered clients

BCS v8.00o

Oct 31, 2015

Log

- bug fix: an error message would sometimes appear (something called a “reserved” error; steps have been taken to hopefully prevent that from recurring)

Estimates

- Summary tab
 - “*” button (to calculate Markup Adjustment)
 - bug fix: calculator now works properly

Jobs

- Log tab
 - bug fix: clicking the *Clone* and *Res/Ack* buttons sometimes yielded error messages about another user attempting to edit the same record

Reports

- Employees
 - Employee Security (#99)
 - in the “Reports User Cannot Access” section, no longer show reports developed for a specific client and not globally available to all BCS clients

BCS v8.00n

Oct 27, 2015

Reports

- Time Sheets
 - Activity Report – Detailed (#268)
 - Activity Report – Summary (#269)
 - reports now include time sheets with no specified activity (“** no activity **” is shown on the report)

BCS v8.00m

Oct 22, 2015

Phone List

- Attachments tab
 - radio buttons were not always causing the appropriate documents to be listed (was not corrected properly in v8.00l)

Time Sheets

- Delete button
 - bug fix: the delete had been working but displaying an error message after the delete completed

Reports

- Utilities
 - Diagnostic – Jobs With Sales Pct not equal to 100%
 - bug fix:report no longer prompts user for a field value
-

BCS v8.00l

Oct 4, 2015

Phone List

- Attachments tab
 - radio buttons were not always causing the appropriate documents to be listed

Jobs

- Log tab
 - a workaround was put in place to hopefully address the occasional error message appearing suggesting that another user had a log record already locked
- Close tab
 - bug fix: *Problem Job Reason* and *Description* are now editable again for users with access to this tab and in situations where job is a loss (rather than a profit)

Administration

- System Info
 - Global Report Settings
 - Defaults tab
 - specifying default reports was triggering error messages for some users
-

BCS v8.00k

Sep 29, 2015

Splash Screen

- BCS bitmap has been restored to splash screen

Sales Calls

- Save button
 - when the response is “OK & add another”, an error screen no longer results
-

BCS v8.00j

Sep 28, 2015

Jobs

- Labour tab
 - blue arrow button now properly navigates to specific time sheet record
-

BCS v8.00i

Sep 24, 2015

Sales Calls

- Save button
 - when the response is “OK & add another”, an error screen no longer results

Time Sheets

- Save button
 - when the response is “OK & add another”, an error screen no longer results
 - when the response is “OK”, an error screen no longer results

Reports

- Jobs
 - Service Order Work Report – Customer (#39)
 - Service Order Work Report #3 – Customer (#177)
 - bug fix: reports had occasionally been claiming that no data was available
-

BCS v8.00h

Sep 23, 2015

Time Sheets

- Save button
 - when doing a save, an error screen no longer results
-

BCS v8.00g

Sep 22, 2015

Reports

- some users reported issues with the menu bar only closing after two clicks of the Close button; a potential workaround has been introduced

BCS v8.00f

Sep 16, 2015

Splash Screen

- because of a distorted appearance on high resolution minors, the BCS splash screen has been replaced with a temporary one, until such time as a new high resolution graphic has been created and can be used in the old graphic's place

All modules

- various miscellaneous Access version-related bugs have been addressed, most notably those triggered when a save is performed

BCS v8.00e

Sep 14, 2015

All modules

- Back button
 - if you are asked to save your changes and you hit cancel, you no longer receive an error message

Jobs

- Labour tab
 - blue arrow button now properly navigates to specific time sheet record

Sales Calls

- Save button
 - when the response "OK & add another", an error screen no longer results

BCS v8.00d

Aug 31, 2015

Purchase Orders

- a change was made to hopefully address "overflow" errors sometimes occurring after a PO line item was updated and the user moved to another tab in the PO module

BCS v8.00c

Aug 20, 2015

Quotes

- various errors were occurring upon saving a quote; steps have been taken to hopefully address these errors

BCS v8.00b

Aug 17, 2015

Quotes

- the save was failing when attempting to create a quote based on an estimate; logic has been inserted to hopefully address this situation

BCS v8.00a

Aug 17, 2015

Log

- *Go directly to Sales Call...* button
 - when landing on the Sales Call record, the *Save* button is now active

Jobs

- *Add Purchase Order* button
 - when landing on the Purchase Order record, the *Save* button is now active
- *Add Time Sheet* button
 - when landing on the Time Sheet record, the *Save* button is now active
